

Erasmus+ - Do you face any difficulties in using the learning agreement in the present suggested form? Did you amend it? Is Online Learning Agreement (OLA) a solution? What would be your recommendations for the future Erasmus+?

1. Did the more complicated LA result in a better recognition? Studies on that?
2. Mobility window!
3. Good idea in itself, but still many concerns:
 - Too many systems for students → integrated
 - Contents too complicated for students
 - Erasmus office loses control
 - Not all NA's accept signatures
4. Many versions of Las
 - Problem
 - Wish to be allowed to adapt to the needs of the institutions
5. Host universities should not use their own LA for incoming students → Erasmus = home institution
6. Pilot (Bergen) is successful → positive
7. Pre-fill certain details in OLA
8. Is LA really necessary? Don't use it for non-european = no problem!
9. No after port in LA
